Year founded: 2014

HQ: Mount Horeb, Wis.

Co-Founders: Kurt Wedig, *President & CEO*
Dan Parent, *Chief Operating Officer & Vice President of Engineering*

Number of employees: 13

Fundraising: \$4.5 million (angels)

Product: OnePrevent®, launched Feb. 1, 2017. OnePrevent is the only predictive modern safety solution on the market that protect buildings, homes, assets and occupants. The system's powerful, cloud-based learning and analytics engine is embedded inside a series of sensing devices. This smart technology learns what's normal for a building or home environment, and uses abnormal readings to determine potential risks. It processes each data point through its patented algorithm and alerts a building manager or homeowner via a smart app on a phone or tablet. OnePrevent can reduce loss, improve safety, save money, and make owning or managing a property easier.

Manufacturing partners: Ei Electronics, Shannon, Ireland

Patents: Nine granted, with 12 applications awaiting approval

Advisory Board: Jack Murphy, national fire safety expert
Brad Murphy, Murphy Consulting
Brent Yauchler, The Electrician Inc.
Dale Van Dam, M3 Insurance
